

EASYCLIX LIVING - SIZE M

Replaceable foot set for HAILO stepladders.

THE KEY FEATURES

The new replaceable foot system
From basement to loft, a ladder is essential for the huge range of jobs that need doing throughout the home, whether it's cleaning windows, hanging curtains or putting the laundry away. And to do these jobs, the ladder needs to stand on a variety of surfaces, such as floor screed, tiles, parquet and marble. The problem with conventional household ladders is that they're not equally suitable for all floor coverings and so they don't provide optimum stability on all surfaces.

We have now solved this problem and developed our innovative replaceable foot system, EasyClix, which makes a versatile all-rounder out of all HAILO stepladders (manufactured from 01/2015 onwards). The idea is that the ladder can be fitted with the right feet for any surface with just a few manual adjustments!

- No more scratches or streaks on parquet, marble, etc.
- Soft profile
- Non-slip stability
- Quick change
- In compartment for easy access
